

Launch of Civic Hub & Progress Update

Greetings and a Happy Ugadi to all,

As the city revels in festive fervor, we are pleased to update you on our latest initiatives and activities. B.PAC has, over the last two years trained over 100 passionate citizens in two batches under its B.PAC Civic Leadership Program (B.CLIP). It has now chosen ten B.CLIP participants to lead Civic Hubs. The participants were chosen based on the following criteria:

- Participants who are actively engaged with the political system & working on civic and / or community issues in the ward
- Continue to have connect with citizens in the ward
- Demonstrated execution capabilities at grass root level
- Working closely with B.PAC & B. CLIP programs

Civic hub seeks to further the grassroots leadership capabilities of the B.CLIP participants and strengthen the engagement with the citizens in their wards through meaningful interventions and innovative solutions to civic issues . The program will also help the citizens to have easy access to government schemes, voter registration assistance, environmental initiatives etc. Seven such civic hubs have already been set up across the city and three more will be set up soon. All our civic leaders are actively working on various issues in their respective wards with great enthusiasm to bring about a positive change in their neighbourhoods and the city.

Subbaiah T. S & Geetha G in Radhakrishna temple ward &

Sanjaynagar respectively, Hebbal Constituency.

Geetha G with Ms. Revathy Ashok during the Civic Hub office launch in Sanjaynagar ward

Subbaiah during Civic Hub office inauguration with other B.CLIP participants

Subbiah T.S & Geetha. G are working together on neighboring wards - Sanjaynagar and Radhakrishna temple with a motto of social change. The initiatives are focused to make their wards clean, green and livable. The initiatives taken are

- Waste segregation campaigns,
- Plastic free Sanjaynagar
- Composting workshops & demonstration of leaf composting in the civic hub garden space
- A first of its kind manned kiosk was set up with the guidance of Slid Waste Management Round Table (SWMRT) expert Mr. N.S Ramakanth. Manned Kiosks helps in avoiding collection of mixed waste, maintenance of transfer points and educates people on segregation.
- Candidate's meet citizen during Hebbal by poll elections.

As part of the winning team of Neighbourhood Improvement Program challenge, their comprehensive mobility plan for Sanjaynagar won amidst stiff competition from over 100 entries. Since behavioral change among citizens is necessary to effectively implement their mobility plan, Subhiah & Geetha are organizing Cycle Day and Walk to School programs. The last cycle day organized by them witnessed the participation of newly elected MLA. Around 1500 students from 7 schools in the neighbourhood walk to school every Saturday and the initiative has been greatly appreciated by parents.

12 civic groups win grants to shape their locality the way they want

BENGALURU, DHNS: Twelve civic organisations and community associations in the City, who have won the Neighbourhood Improvement Plan (NIP) Challenge, will soon be implementing their own plans to ensure a sustainable local development in collaboration with the Bruhat Bengaluru Mahanagara Palike (BBMP).

Said to be first of its kind in India, the NIP challenge is a competition among civic groups to come up with best-practice solutions to improve their neighbourhood. On Saturday, associations whose ideas have been accepted will be given a cash reward between Rs-3 and 15 lakh to go ahead with their NIP.

Under the NIP challenge that began in May, each of the 86 participating member associations had to first identify problems in their areas and then come up with solutions to address them. Participants included Residents' Welfare Associations, apartment associations, gated communities, community-based organisations like Rotary and Lions and NGOs working with underprivileged groups.

The participants were asked to work their projects to improve mobility with a focus on public safety, revamping public spaces, off-the-grid initiatives (like local energy production in low-income areas), waste management, environment and lake development.

The projects were independently evaluated by a group of domain experts before zoning in on ten plans to execute based on their robustness, sustainability, project cost and the time required to complete.

Structured and run by civic activists V Ravichandrar, Ashwin Mithesh and Kalpana Kac, the NIP challenge is an initiative of the United Technologies Corporation as part of its Corporate Social Responsibility (CSR), Citizens for City (C4C).

"The idea was to use these projects as a demonstration and leverage development of similar nature in other neighbourhoods of the City in the coming days," Ravichandrar said, explaining the concept.

Innovation
 ■ Inclusive Integrated Energy Centres: Seko Foundation

Technology
 ■ Streetlighting with Sensor-based LED Lighting: Sri Sri Paradise and Other 3rd Main, New Thippasandra Residents, and RISE, HAL 3rd Stage

Methodology
 ■ Lining of Major U-Turns: FORCE Brookfields

Kiosk may end garbage crisis

Sanjaynagar residents hope the waste booth initiated along with Vidya Sagar school and operated by pourkarmikas will serve as pilot for the city struggling to effectively dispose of its trash

With garbage to be removed at intervals that range from 10 to 15 days, it becomes a big concern, for children and vulnerable health hazards posed by pest-infested refuse that accumulates from morning markets. Faced as they are with this situation on a daily basis, the management of Vidya Sagar Pre-school in Hebbal and residents of neighbourhood have decided to take the bull by the horns.

"They will make households of the area aware of how to manage their waste; that they should first segregate it as dry and wet waste before disposing of it the way it is meant to be, and ensure not to dump it on the street."

They even have decided to set up a 'managed' garbage kiosk, which will be operated by pourkarmikas of the civic body. In the event of the door-to-door collection by BBMP personnel not functioning.

"This will be replicated in the rest of the ward, and the fact could be reproduced in the entire city as BBMP is experimenting with the idea here," a member of Vidya Sagar Pre-school Parents' Association, Shama Nithey told BM.

Parents and children went around creating awareness about the importance of waste segregation at the source to keep the neighbourhood clean. Accompanied by school-children, members of the group will go around on week-days, like in old-fashioned door-to-door collection by BBMP.

"We plan to implement it across the ward. BBMP will also carry out its intensive cleanups only in the surrounding of the school. The event had to be outside other schools. Street programmes, rather, the team should be in the frontlines to solve the issue," said Nithey.

"It has been in the frontlines since the government model to be followed in the entire city since the government is faced with the garbage crisis and chaos on its streets," he added.

Volunteers of the school will make a bi-monthly event and C4C had made the effort to post such photos on social media along with their name and bus names there.

BBMP officials and pourkarmikas. Since it is to do with the government, under the 1976 legal to only one body about the programme.

"There was large of garbage dumped around our school, where more than 1,000 kids come every day. The parents were concerned about their children and they came forward with the idea of cleaning the backdrop and to create awareness in the neighbourhood to stop dumping waste on streets. We want to prevent children as well as public street being hit due to morning garbage. We shall continue this activity in long-term basis," said Nithey.

Mr. Narayana of C4C. "It is the primary association only were active about the issue. Not just about waste segregation awareness, the public needs to stop collecting against door-to-door collection by BBMP. Instead, we should first do our segregation fit in our house. The managed garbage kiosk will be managed by the pourkarmikas from 6.30 am to 1.30 pm, where the waste can be disposed of. Also, we plan to install CCTV cameras to spot offences who dump waste on streets. We shall post such photos on social media along with their name and bus names there."

Jayalakshmi, Mahalakshmi, Mahalakshmi layout Assembly Constituency

Jayalakshmi has set her office in Mahalakshmi ward. Mr. Gopalaiah, MLA, Mahalakshmi layout ward and Mrs. Hemalatha Gopaliah, Deputy Mayor inaugurated the civic hub office. They appreciated the efforts of B.PAC and extended their support to civic hub. Since Jayalakshmi's ward has low income families, her focus is on helping urban poor with various government schemes such as

- Under National Urban Livelihood Mission (NULM) project, two self-help groups
- Insurance under Mahathma Gandhi Bunkar Bheema Yojana, Driver's program etc.
- Permissions to issue Yashaswini card (Health insurance) across the city.

She has also submitted a proposal for a pure drinking water plant for her ward. She has cleared a blackspot in a prime location of her ward and has installed CCTV cameras to ensure the blackspot doesn't reoccur. She also conducted Diabetes awareness program and a women's day program for women of various self-help group of her constituency.

Eswarappa, Sriramamandira ward, Rajajinagar Constituency

Eswarappa during inauguration of Civic Hub

H. Eswarappa has set up office in Sriramamandira ward. Deepa Nagesh, Corporator of Sriramamandira ward inaugurated his office space. He is a known activist in trying to make Bengaluru free of illegal hoardings and has made his ward free of such hoardings. Further, he wants to beautify his ward with art work on public walls. He has brought to the notice of BESCO, areas where electrical safety is required. He has filed complaints to fix street lights and to put fence around poles. He is also extensively promoting the B.PAC Spotter app and filing complaints on the app.

Kavitha Reddy, HSR Layout, Bommanahalli zone

Kavitha Reddy during the #killbill campaign

Kavitha Reddy has set up civic hub with an objective to make her office a doer's den. She has brought together residents of HSR layout by starting Hasiru Mithra – a volunteers group. She is actively working on waste management and lake rejuvenation. Since she has led the waste management initiative, HSR is now a visibly cleaner locality.

- SWM
 - *Visible cleaner locality*
 - *Maintained Black-spot clearance*
 - *17 Workshops, 05 Talks, 10 Boards on waste segregation*
 - *40000 + SMS to residents, 12 Black-spot removal & Clean-up drives*
 - *10 Plastic Ban drives, 13 D2D Segregation drives*
 - *02 #KillBills Campaign*
- Parks
 - *All Parks cleared of dry leaves*

○ Better Park Administration

We congratulate Kavitha Reddy, as her efforts to rejuvenate Agara lake has triumphed. The funds for rejuvenation of lake has been released and the project is on track. She, along with other residents are working on rejuvenation of Somasundarapaly lake. The DPR is in progress and MLA has assured to release the funds to revive the lake.

Media coverage for initiatives by Kavitha Reddy in HSR Layout

Mohd. Sufiyan, Sampangiramnagar ward, Shivajinagar Constituency

Sufiyan has set up his office on Infantry road, Sampangiramnagar ward. Mr. Roshan Baig, MLA Shivajinagar inaugurated the office. Along with awareness drives of segregation, plastic ban drives, composting workshops, Sufiyan has been successful in stopping illegal dumping of garbage by apartment owners. His ward has a kindergarten for children of daily wage workers. The kindergarten did not have water connection and caused trouble to little kids and

teachers. Sufiyan was successful in reaching out to BWSSB and getting necessary water connection to the school.

Residents take illegally dumped garbage to source, confront staff

VIJETHA S.N.

COMMENT (1) · PRINT · T T

Activists found evidence that the waste had originated from a particular building.

Bangalore Political Action Committee and the Active Residents Welfare Association caught staff of a commercial building on Infantry Road illegally dumping garbage on the streets.

"The garbage contractor would pick up waste from nearby commercial buildings and dump it on the Infantry Road junction, turning it into a black spot posing health hazards to residents," said Mohammed Sufiyan from B.P.A.C. He, along with Sudarshan from the Active Residents Welfare Association, a BEMP supervisor and a health inspector, caught the perpetrators red-handed on Monday evening.

After the waste bags were dumped at the junction, Sufiyan and his team opened them.

Most of the dry waste was from a particular commercial complex. They loaded the garbage on a BEMP truck and drove it to the building.

The maintenance manager stated that they have outsourced waste disposal to a private contractor.

The citizens showed evidence that the waste originated in that building. The manager accepted and allowed the waste to be kept within the building's premises.

Ashok Nidgil, Jayanagar East, Jayanagar Constituency

Ashok Nidgil is working on Jayanagar east ward. Each ward has unique issues. The root cause of blackspots in Jayanagar east ward was dumping of waste by vegetable push carts and vendors. The push carts were cause of traffic congestion and lack of parking space in the area as well. He has left no stone unturned to solve the issue. He filed RTI and found out that the vegetable vendors were issued space in vegetable market. But, they had sub-let the space to other vendors and were illegally occupying space on streets. He

brought this to the notice of MLA, officials of BBMP, Traffic police and also filed a writ petition. Now, he has been successful in eliminating the black spot in the prime location and decongest the traffic flow. This has helped him gain support of citizens of his ward. He has also filed an RTI on ongoing infrastructure work in his ward and is monitoring the same.

The civic hub members met on 31st of March, 2016 and exchanged their ideas and shared their learning.

We are enthralled by their work and look forward to more in coming days!
If you would like to get in touch with our Civic Leaders kindly write to us at kishore@bpac.in or sushma@bpac.in

Our B.CLIP batch 4 admissions are now open. Please write to us at rajatha@bpac.in or bclip@bpac.in for more details.
