CITIZENS' MANIFESTO FOR **PADMANABHANAGAR**

Mobility &
Infrastructure

Waste
management

Health

Water &
Sanitation

Women &
Child

Environment

APRIL 2018

Padmanabhanagar at a glance:

1. Area:10.5 sq. km
2. Population: 306353
3. Wards: Hosakerehalli | Ganesh Mandir ward | Karisandra | Yediyur | Banashankari temple ward | Kumaraswamy Layout | Padmanabhnagar | Chikkalasandra
4. MP Constituency: Bangalore South
5. Household: 77057
6. Road length: 343 km
7. Lake: Karisandra, Yadiyuru, Gawdanpalya (Kadirenahalli), Chikkalasandra, Ittamadu
8. Police stations: Girinagar, Banashankari, KS Layout
9. Bus stops: 134
10. Fire station: 0
11. Government schools: 16
12. Playgrounds: 21
13. Parks: 74

Namma simple ask:

1. MLA to chair a monthly general meeting with civic agencies, corporators and citizen groups with set agenda to enable citizen participation in decision making.
2. Padmanabhnagar constituency website to provide relevant data and information with respect to development initiatives in the constituency and citizen demands including local area development fund utilization.
3. Transparent and consistent communication on current and future work. Public consultation through online and offline media.
4. Communicate legislator's stand on various policy matters that would be tabled in the assembly. Hold consultation with citizens on pressing issues via online and offline medium
5. Robust volunteering opportunities for citizens to participate for various causes.
6. Internship opportunities for college students and special opportunities for home-makers and senior citizens to contribute to Padmanabhnagar's development
7. Contact details of concerned officials (BBMP, BESCO etc.) must be made available at ward office and other prominent places along with allotted time for grievance redressal.
8. Biometric attendance at all the civic agencies
9. Quarterly report to citizens on constituency's progress
10. Constituency map with civic amenity sites to be put in public domain

The top 5 ask:

Waste Management

1. Scientific waste collection system with separate vehicles for dry waste and wet waste. The vehicles to have GPS trackers
2. Scientific transfer points wherein waste from smaller vehicles is directly transferred to larger vehicle
3. Decentralised waste management system wherein wet and leaf waste from Padmanabhnagar should be processed in Padmanabhnagar. The process to include citizens and information must be disseminated to citizens
4. Temples, educational institutions and other bulk waste generators to be encouraged and supported to be source of zero waste.
5. Visual cleanliness to be prioritised. Mark all the blackspots and take measures to beautify and monitor.

Mobility and transport

1. Pedestrian friendly and accessible footpath free of encroachment.
2. Accessible public transport and last mile connectivity options from Metro stations
3. Disseminate information on specifications of roadworks undertaken at Padmanabhnagar.
4. Redesign main roads such as Banashakari temple road, Uttarahalli main road and others to be free of bottlenecks
5. Publish constituency map with details of CA sites, public roads etc. and provide civic and social infrastructure for residents such as indoor stadium, auditorium etc.

Water

1. Few areas in Hosakerehalli and Banashankari do not have water supply. Equitable water supply of 90 lpcd to all the residents
2. Overflowing of sewage in few areas such as Kadirenahalli circle must be checked
3. Check lake encroachment and rejuvenate lakes
4. Allocate annual maintenance cost and ensure RO purifiers are functional
5. Conduct hydrological study and terrain modelling to plan water conservation. Rain water harvesting in all public building and spaces.

Women and child safety

1. At least one model Government school in each ward with good quality infrastructure and learning outcomes.
2. Public places to be well lit, have accessible footpath, sufficient police patrolling and CCTVs to aid redressal measures.
3. Awareness on safety and empowerment resources for women across income groups.
4. Special focus on young college students, young women and disabled on career building opportunities.
5. Carry out crime mapping exercises and include citizens in crime prevention and redressal measures by introducing/revamping support persons and neighbourhood watch programs.

Environment and health

1. Maintain equipment at parks. Provide basic facilities at parks such as security, toilet, drinking water and first aid.
2. Monitor and maintain green cover (scientific tree pruning) and open spaces.
3. Preventive health care measures to prevent dengue and other diseases
4. Primary Health Care Centres across, diagnostic centres across constituency.
5. Air quality and noise level monitoring indicators to be installed

**Annexure:
Waste Management**

Current	Desired status	Ideas to achieve
Segregation and collection		
New residents move into a building/locality/society and are not aware of waste segregation	To achieve over 100% waste segregation	Designated date for monthly awareness on waste segregation and data on level of segregation to be publicised on same day
Irregular service and waste-pickup time by waste collectors	Regular and on-time waste pickup	Collection vehicles to have GPS and to be tracked in real time, should adhere to standard design. Communicate to citizens via SMS and social media
The DWCC at ward 182 is not well maintained.	Efficient DWCCs at each ward	Facilitate to raise funds from corporates or higher budget allocation from BBMP to efficiently run DWCCs
Increase in generation of Construction & Debris waste due to residential renovation work	Scientific processing of Construction and Debris waste	Awareness on C&D waste management to citizens. C&D collection centre to be set up. This will reduce the management cost of C&D waste.
Collected waste is dumped at transfer points Eg. Kadirenahalli underpass, near Prarthana school	Transfer points are perpetual blackspots	Need scientific transfer points. Smaller vehicles should directly unload the waste to larger vehicle
Push carts used by Pourakarmikas are broken and difficult to use in high slope roads	Need better push carts which are easier for Pourakarmikas to use	Electric pushcarts to aid Pourakarmikas
Waste Processing		
No waste processing centres	Wet waste collected to be managed at the constituency	Resources to efficiently run the processing plant. with funds obtained from CSR or BBMP
Burning of leaf and garden waste has led to air pollution	In-sit composting of garden waste at ward/constituency level	Leaf waste composting units and sufficient funds to run the operations.
Bulk waste generators generate high quantity of wet waste	Bulk waste generators to be source of zero waste	Campaigns and initiatives to encourage and incentivize in-situ composting at apartments, schools, hotels etc.
Low awareness on home composting	At least 10% of houses to compost waste at home	Monthly Composting awareness programs to be held at ward office for residents
System and technology support		
Staff and system are not monitored	Monitoring system to monitor and ensure efficient functioning of waste management system	Citizens are to be introduced and included in the waste management programs. The required training is to be completed by all volunteering citizens for official recognition
Lack of communication to citizens	Communicate to citizens on level of segregation,	Waste management indicators data are to be processed in a

	campaigns and programs related to waste management	recommended format and is to be made accessible to citizens online through the internet or at the ward office
Rampant use of plastic material even though it is banned	Efficient implementation of plastic ban	A team who aids citizens to recognize and adhere to the plastic ban law and to penalise establishments for using or issuing plastic
Low awareness among Pourakarmikas and health workers regarding proper waste management	Pourakarmikas and health workers to be fully aware of all aspects of waste management	Orientations to be held to educate the health workers and Pourakarmikas and introduce incentives to encourage them
Cleanliness and hygiene		
Large number of blackspots at 6 th cross, RK Layout, Ring road (Iliyaz Nagar), Goedanpalya kere	Black spot free Padmanabhnagar	Consult urban space experts to chalk out a plan to beautify and monitor the railway line area
Pourakarmikas' are prone to high risk health concerns	Preventive health care for Pourakarmikas'	Clean toilets and water are to be accessible to Pourakarmikas'. Check-ups are to be conducted periodically and preventive medicines are to be provided to PKs'.

Mobility and Infrastructure

Current	Desired	Idea to achieve
Road works		
Details of undertaken roadworks are not easily accessible to citizens and therefore, not able to examine the quality or question concerned officials or contractors	Transparent communication to citizens on undertaken road work	Specifications of on-going roadwork are to be publicized for quality inspection and perusal of the citizens. Road history to be put in public domain.
Signboards are not visible at nights	Night vision signboards	Fluorescent amber signboards
No road work has been carried out for 6 years at JHBCS layout.	Road works should be regularly carried out	Put road history in public domain
Condition of roads deteriorates due to water logging along with the formation of potholes. Concrete roads in Kumara Swamy layout are deteriorated.	Maintain motorable roads throughout the year	Placement of system to promptly repair potholes and to fine/blacklist contractors
Random/ unnecessary speed breakers in main roads and residential areas	Scientifically located speed breakers	Development of standard design and system to report

		and replace unscientific speed breakers
Congestion		
Banashankari temple to kadirenahalli cross road/Uttarahalli main road has bottlenecks	Bottleneck free roads to help ease flow of traffic	Work with experts to redesign roads to be free of bottlenecks and better traffic management plan
Few sign boards such as indicating Nayandahalli is wrong	Right sign boards	Re check sign boards and replace with right ones.
Lakshmikanth choultry has blocked road	Accessible public roads	Publish public roads map and remove any illegal road blocks/encroachments.
Large number of abandoned vehicles at JHBCS layout	Free of abandoned vehicles	Action plan with waste recyclers and police to manage abandoned cars.
No U-turn from Kadirenahalli underpass to Deve Gowda petro bunk	Need U turn to avoid unnecessary commute	Check with experts on service roads/U turn to help vehicles
Public Transport		
No bus stop at Kadirenahalli cross	Bus shelters are required	Ensure all bus stops have bus shelters with Passenger Information System
No bus connectivity from Padmanabhnagar to Yeshwanthpur, railway station and satellite bus stop	Bus connectivity	Provide affordable and accessible bus services to key locations
Inadequate last mile connectivity options from metro station	Accessible and economical last mile connectivity from metro stations	Options to be prioritized for persons with special needs and senior citizens
Pedestrian friendly/Cycling/E-transport		
Improper footpaths have made it inconvenient. E.g. From Banashankari temple to Kadirenahalli	Pedestrian friendly footpaths	Footpaths are to not exceed a height of 6 inches and the footpaths are to be uniform in height
Median height is high and residents are unable to cross the road	Able to cross roads at ease	Reduce median heights to help cross the streets, at least at select cross ways.
Footpaths are encroached in commercial areas and illegal hoardings block the footpath. Eg. Kidney Foundation Hospital; Flag hoisting poles; residents set up parks on footpaths; 2 nd hand car showroom in Padmanabhnagar main road	Footpaths are meant for the use of pedestrians only	Zero tolerance towards footpath encroachment and a process to remove encroachments
Hawkers unscientifically occupy footpaths	Designated spaces for hawkers	ID cards are to be issued to street vendors and hawker zones should be identified

Head light should not be harsh for the eyes – blackening of some area of the light – restricting the lights	Head light should not be harsh for the eyes – blackening of some area of the light – restricting the lights	Head light should not be harsh for the eyes – blackening of some area of the light – restricting the lights
Infrastructure		
Lack of public amenities for infrastructure Access to basic civic amenities	Civic and social amenities for residents	Make details of Civic amenity sites public. Multilevel parking, indoor stadium and other essential civic and social infrastructure for residents

Water

Current	Desired status	Ideas to achieve
Water Supply		
There is a sufficient amount of water supply However, few areas in Hosakerehalli and Banashankir do not have water supply	Equitable water distribution to all the residents. Water supply timings are to be informed to citizens	All residents to get 90 lpcd of water. SMS are a medium to inform citizens about water supply timings.
RO purifiers et up do not work after 1 year	Better utilisation of set up RO purifiers	Allocate funds for Annual Maintenance for RO purifiers
Water conservation		
Inefficient use of water	Awareness and aid to citizens to conserve water	Kiosk/help desk for citizens to aid water conservation (to buy water aerators at subsidized rates and resources to implement rain water harvesting)
Water table levels depleting	Risen efforts to increase water table level	Water tables are to be analysed and sink pits should be implemented. Rain water harvesting on public spaces and public buildings are to be executed
Urban flooding		
Flooding is a major cause of concern. Repeated flooding at Shalini apartments, Dattathreya temple, Umamaheshwari temple etc.	Free of urban flooding and alerts in case heavy rain is expected along with rescue teams	Conduct hydrological study and terrain modelling. Collaborate with experts to prevent urban flooding. Few suggested measures are: <ol style="list-style-type: none"> 1. Increase wall heights of drains 2. Desilting of drains and rajakaluve Use trash traps

Sewage		
Sewage pipes are not periodically desilted	Maintenance of sewage lines	Periodic desilting of sewage pipes. Slurry pumps to be used to remove silt
Sewage is not recycled	Use grey water for parks	Set up STPs in parks and use grey water
Over flowing of sewage. At 18 th main and , kadirenahalli circle	Prevent chamber overflow	Chambers must repaired/replaced
Lakes		
Lakes are encroached and are sewage pits	Well rejuvenated lakes	All lakes to be revived and free of encroachment. No commercialisation in lakes and set up STPs must function.

Environment and health

Current	Desired	Idea to achieve
No restrooms at parks and poor maintenance of exercise/gym equipment	Well maintained parks	Parks to have restroom, drinking water, first aid facility and annual maintenance of gym equipment.
Level of air pollution at traffic junctions is high	Air quality to be monitored in all places and recognize spots that need to be addressed	Air quality and noise level monitoring indicators are to be installed at high traffic junctions and areas under on-going construction work.
Unscientific tree pruning and cut branches are not removed by BBMP	Scientific tree pruning to be carried out	BESCOM and BBMP to develop and coordinate a systematic method of tree pruning
The essential health facilities are not setup in primary health care centres	Accessible and affordable health care	<ul style="list-style-type: none"> • Measures to prevent dengue • Preventive medicine to be given • Preventive healthcare to be prioritized • Primary health care centres and diagnostic centres.
Need toilets in few areas such as Kumaraswamy layout, near Banashankari temple	Require an increase in the number of clean and gender friendly public toilets	Cleanliness and maintenance of toilets in parks to be monitored

Woman and child safety and development

Current	Desired	Idea to achieve
Public spaces		
Inadequate number of CCTVs' in all public places	Public spaces to have sufficient CCTVs'	Install and check functioning of CCTVs periodically
Absence of woman friendly public toilets	Accessible and safe public toilets are required	Model public toilets along with feeding space for young mothers and to be designed and implemented
Low awareness on safety resources available for women and children	All citizens to be aware of resources available	Install boards with messages in parks
Schools and colleges		
Child Protection Policy is not implemented in both Government and private schools	Schools to be a safe learning space for children	Roadmap to revamp and rebrand schools and support to implement CPP at schools. This will also address issues such as drug peddling, road safety, personal safety etc.
Children in Government schools do not have access to extra, co-curricular activities and after school programs (English and self-defence classes)	Comprehensive programs to contribute to growth in academics and overall growth of the children	After school programs to children with aid of community volunteers and other organizations
High school and college students lack of knowledge on available career opportunities	Holistic programs and opportunities for young students to be employable after education	Career and skill development classes and internship opportunities at Government and private workspaces for students
Workplaces		
Low awareness on safety at workplace and no process/system that allows work place related harassment to be reported	All workplaces to be safe for women	Workshops that raise sensitization in men and women working in informal sectors. Promote awareness at various avenues on the law
Police and legal support		
Police stations zones are not made available for citizens	Citizens to be aware of police station zones	Make police stations zones available for citizens
Crime is not mapped	Measures to prevent	Map crimes and analyse data to prevent crimes
No counselling centre	Awareness on police and legal resources available	Set up counselling centre

	Counselling centre to help distressed women and children	
Empowerment		
Inadequate amount of economic empowerment opportunities	Sufficient avenues for women to learn and access opportunities available for economic empowerment	Centres that spread information on empowerment opportunities are to be constructed. Set up programs on computer training, spoken English etc. and make the program calendar available for citizens
Large number of illegal Paying guest facilities	Legal paying guest facilities	Regulate paying guest facilities and police to have the details
Lack of child care facility for women who work in informal sector	Child care centres	Set up day care centre for underprivileged children
